

Value proposition

For sellers

Cudo offers anyone the monetisation of their hardware's idle time, with a special emphasis on data centres and mining farms, increasing their ROI.

For buyers

Cudo offers secure off-chain compute integrations for blockchains and cost-effective cloud services for the general public.

Features

Compute oracles for blockchains, further secured by AMD's SEV

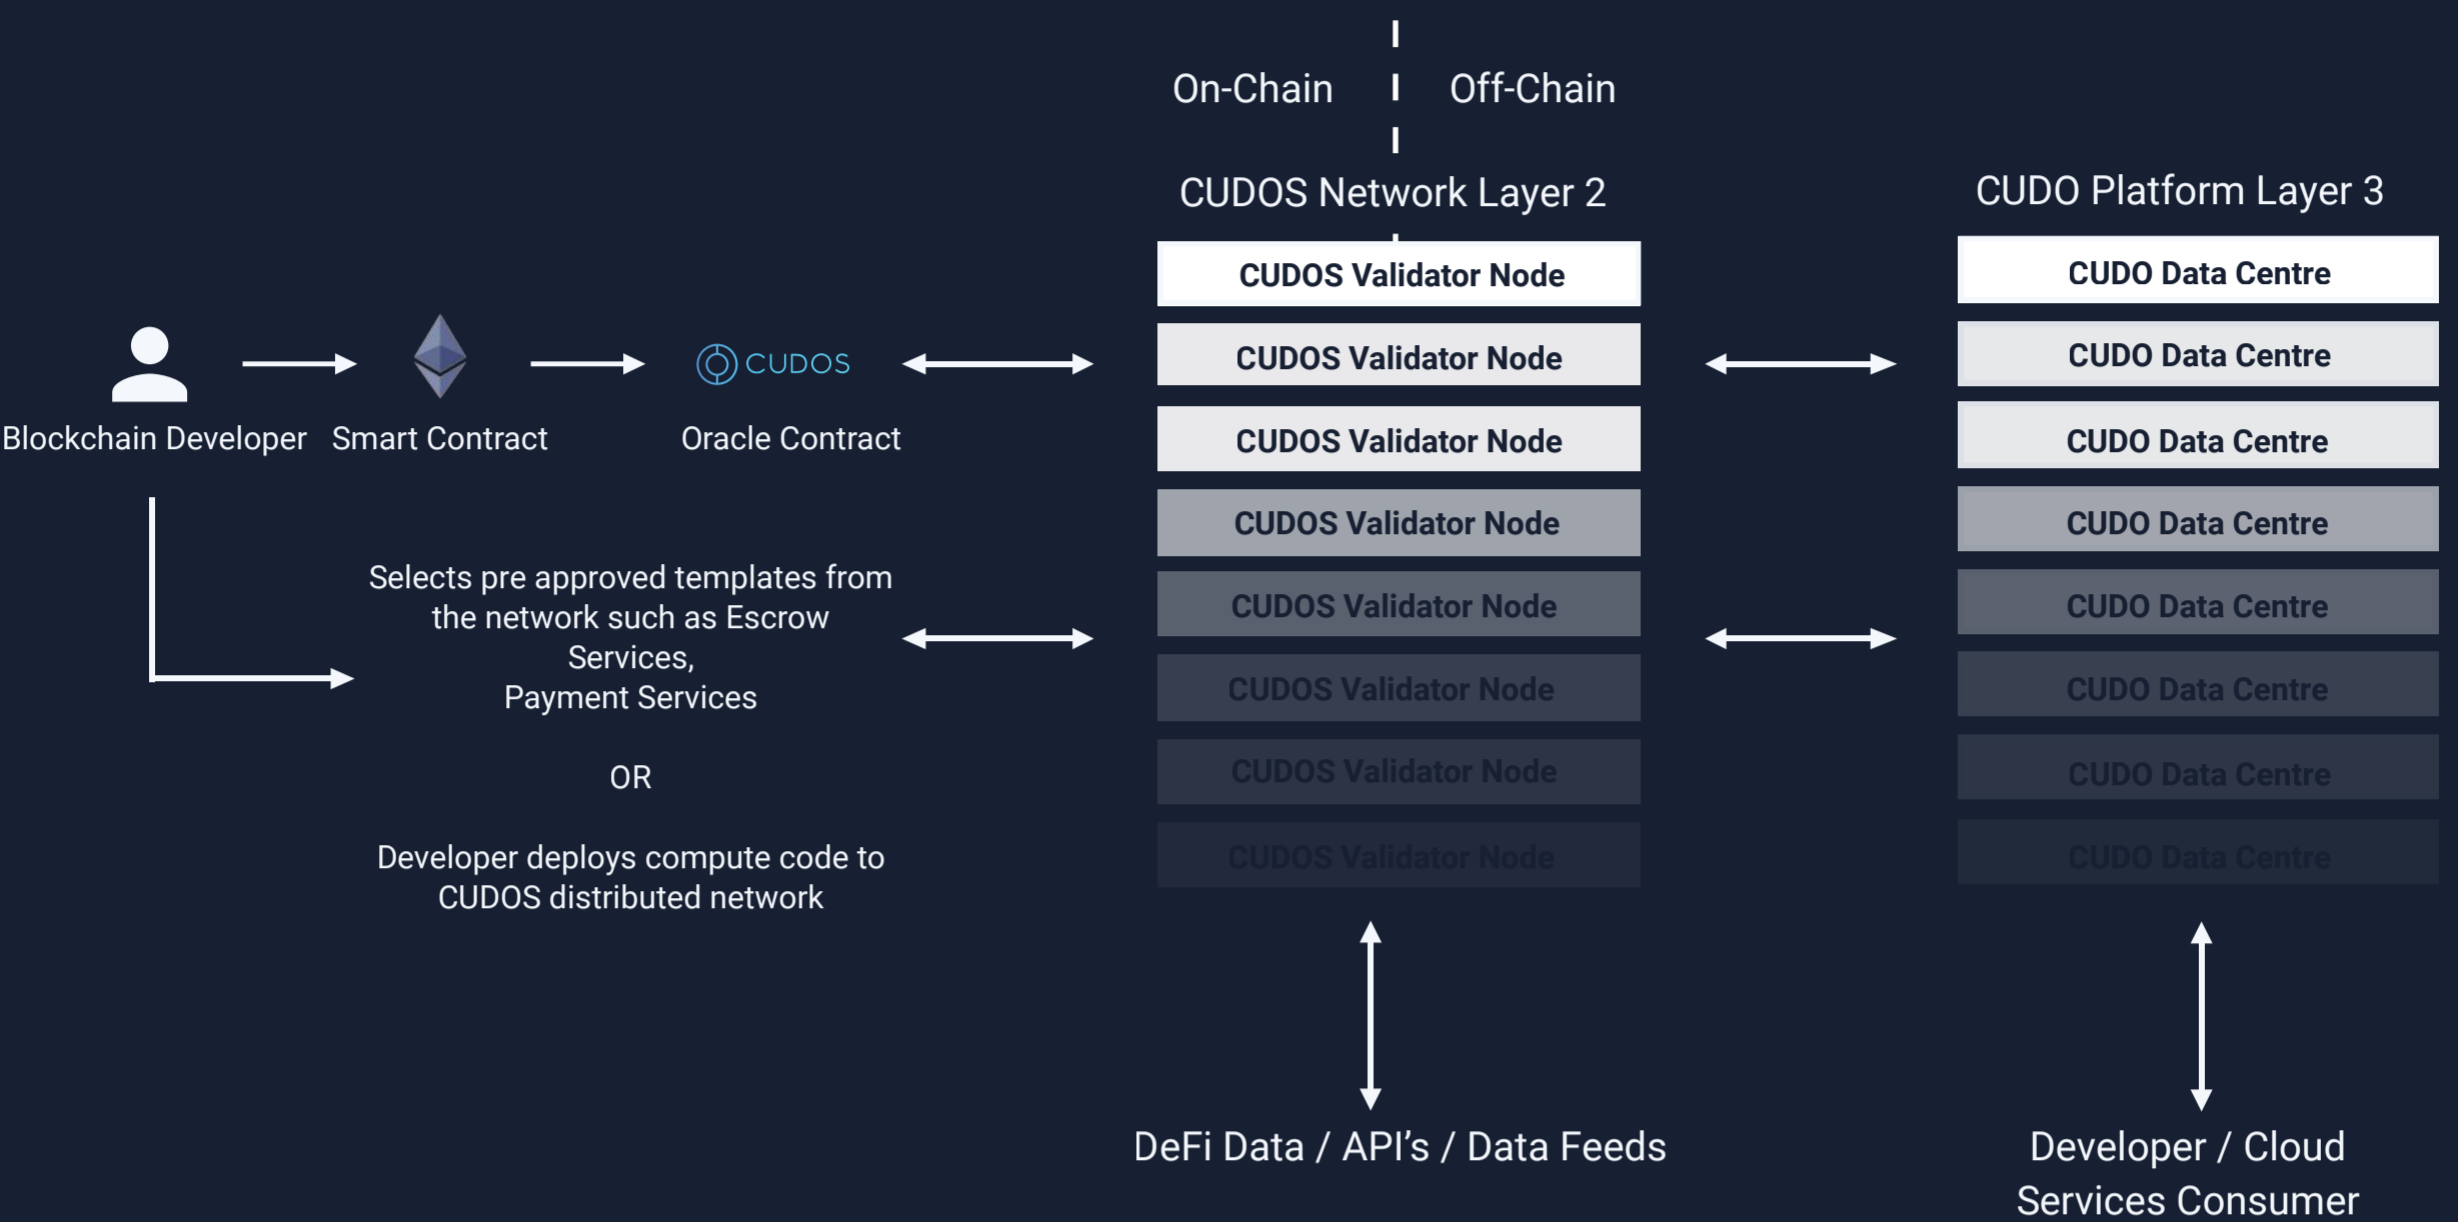

Low-latency cloud computing available worldwide

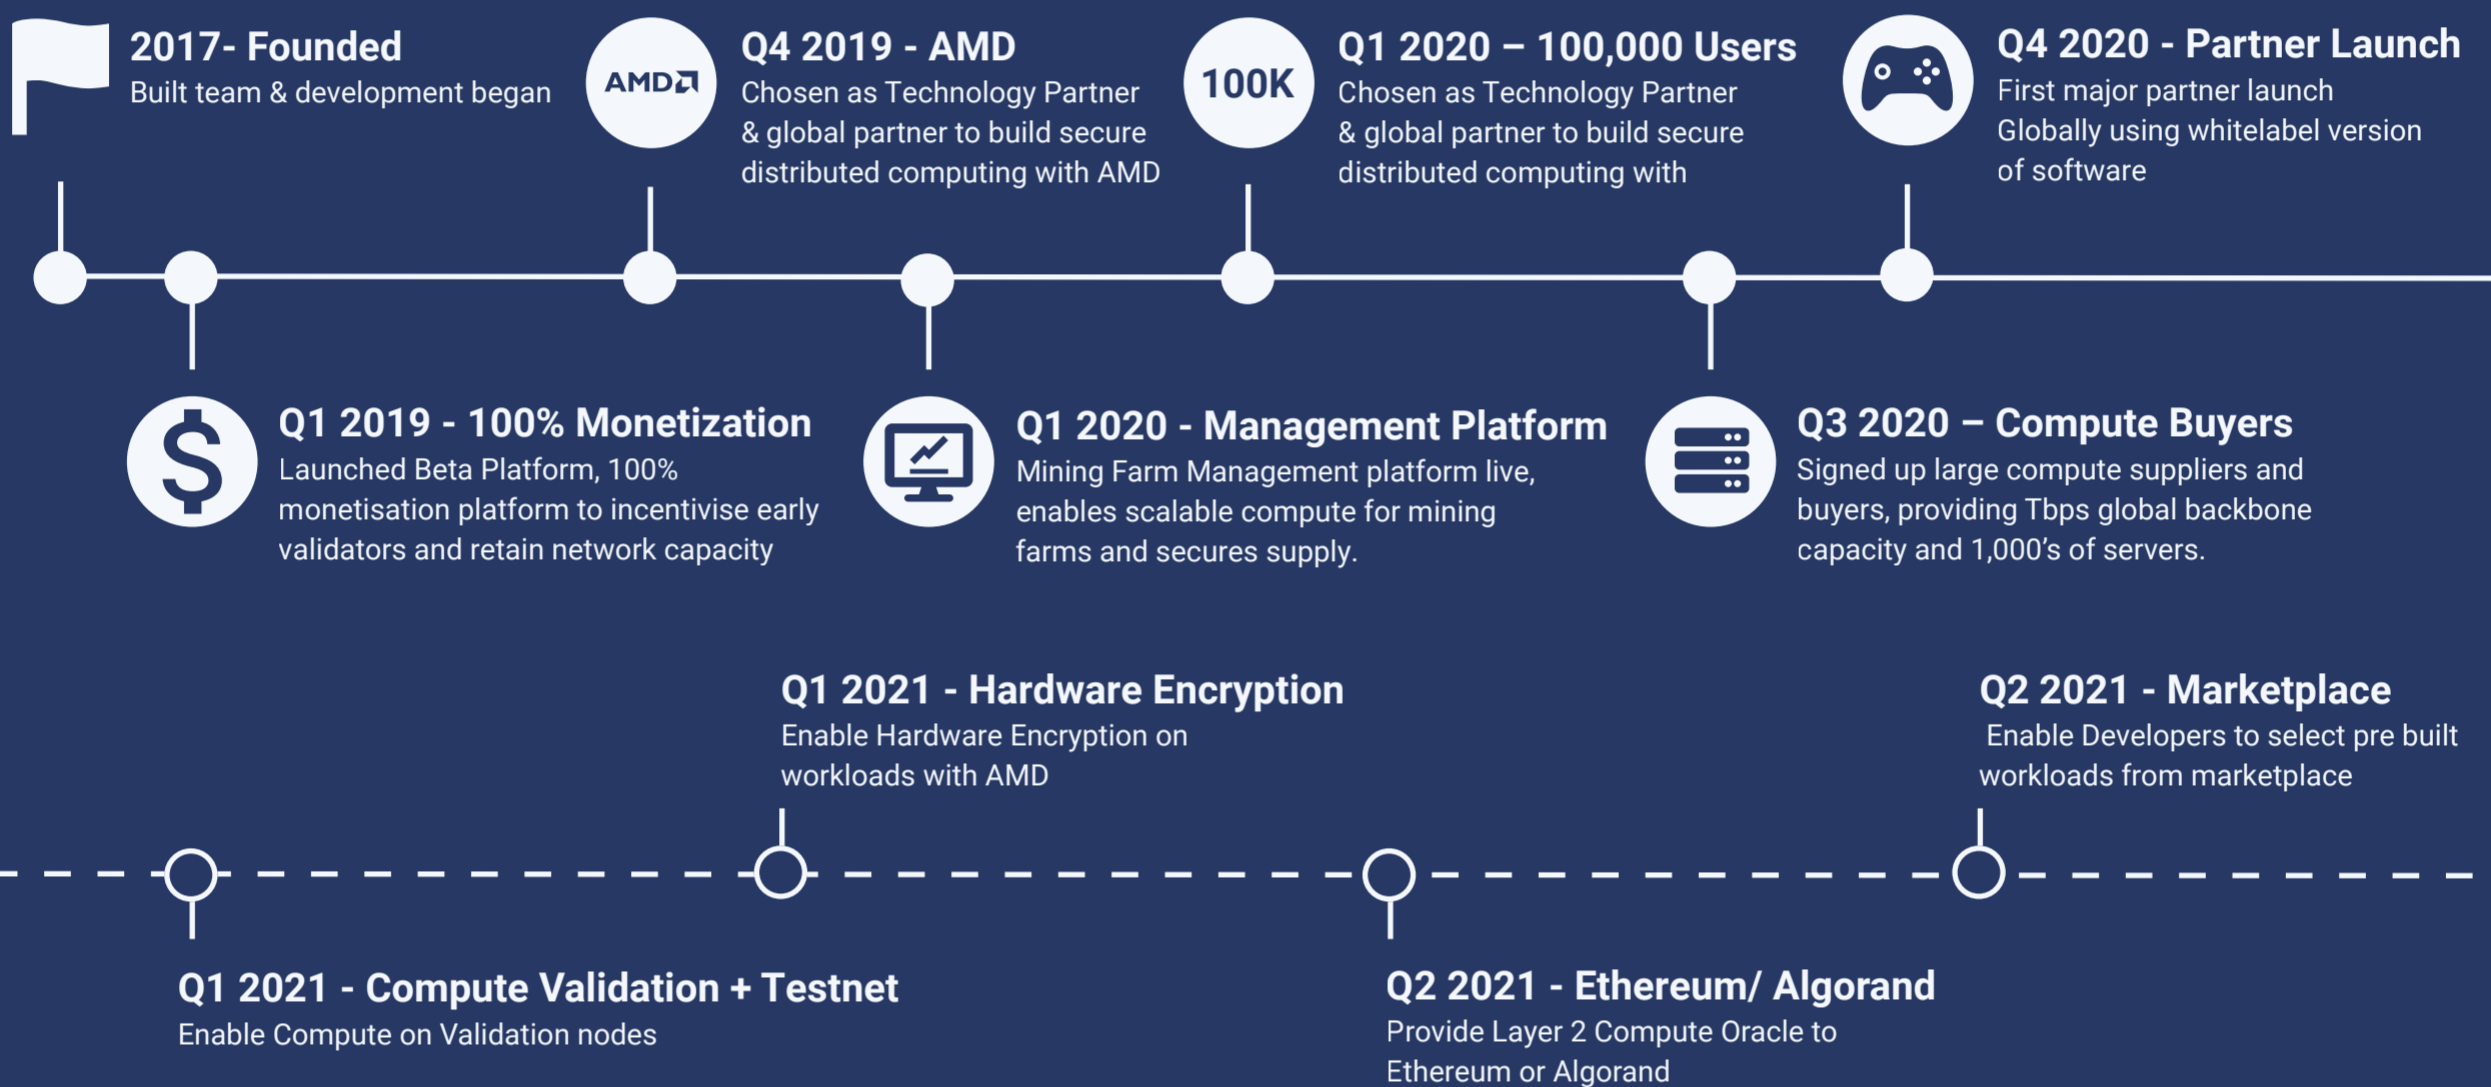

Open marketplace for developers to promote their work

Ecosystem

Roadmap and Key Milestones

Token model

Ticker: CUDOS
Token type: ERC-20
Total token supply: 10,000,000,000 CUDOS

Token utility:

- Staking to become a CUDOS Validator Node (CVN) and get rewards
- Delegated staking to support CVNs
- MoE powering the CUDOS network
- Staking to qualify for receiving general compute jobs
- Staking to obtain a discount on the fees

Token distribution

Meet the leadership team

Matt Hawkins
CEO & Founder

Pete Hill
VP of Sales

Nuno Pereira
VP of Partnerships

Andrew Sturmey
Chief Technical Officer

Andrew Walker
Chief Revenue Officer

Lee Woodham
Chief Operations Officer

Pete Willis
Lead Developer

Key Advisors

Jorg Roskowitz
Director of Blockchain for AMD

Chris Deering
Former President and CEO of Sony Entertainment Europe 'father of the Playstation'

Maggie Fang
Early major investor in Alibaba and Uber.

Malcolm Tuck
MD for ESET antivirus. Previous MD of Kaspersky antivirus

Chris Gale
Co Founder at Verasity.io, a Founder of an early rich media mobile ad platform which sold to Phunware Inc.

Sean Li
Creator of Kitematic, Fortmatic and key part of early Docker team following acquisition

What is CUDO?

Cudo is a distributed computing platform where suppliers of hardware monetise the idle time of their hardware, providing:

- Blockchains a layer 2, Turing complete compute capacity
- Cloud services at a fraction of the cost and with extended personalisation and functionality
